Class B driver's license

JAG.

Profile

Full stack developer studying Information Systems Engineering and a degree in Artificial Intelligence at UTN. I build products end to end: I understand the problem with the people who live it, model the data, build the API and the interface, and leave it running in production. Autonomous, proactive and organized; I enjoy working in a team and writing code the next person can read.

Experience

Software & Product Development Intern
Jun 2023 — Jul 2023

Globant · Córdoba, Argentina

- Intensive immersion program across the full software development lifecycle (SDLC).
- As a team, built an academic management product from scratch, from definition to deployment, in an Agile setup using Trello.
- Product Discovery and UX/UI design: high-fidelity functional prototypes for real problems.

Finance Lead Assistant
Oct 2022

CrystalShips · Junior Achievement

- Student venture: sales analysis, budgeting, bookkeeping and profit calculation.

Education

Information Systems Engineering
Mar 2024 — Nov 2028

Universidad Tecnológica Nacional (UTN) · Córdoba · in progress

- Designing, implementing and controlling information systems for organizations.
- Programming across paradigms: functional, logic and object-oriented.
- Systems analysis and design: requirements, modeling, architecture, testing and going to production.

B.Sc. in Artificial Intelligence
Mar 2024 — Nov 2027

Universidad Tecnológica Nacional (UTN) · in progress

- Language models, machine learning and neural networks applied to real problems.
- Process automation with AI to gain efficiency and reduce errors in repetitive work.
- Tools such as scikit-learn, TensorFlow and PyTorch.

High school, Economics track
2009 — 2023

Instituto Francisco Luis Bernárdez · First flag escort (school and national flags), class representative

English
2012 — 2023

Highland School · B2 level
